8. SEMI-DOUBLE
Loose petal formation with few petals that may be twisted or quilled. All petals form from base of bloom. Staminal column may be missing. (Example - Jimmy John)

9. FULL DOUBLE
Many petals and petaloids in a tight formation, giving a full ball shaped appearance. Staminal column usually missing. (Example - Kona)

10. UNCLASSIFIED
Will require full description. None of the above.

HIBISCUS GROUP HONORS TEAGLE

Atwood Teagle, past president of the American Hibiscus Society, received a plaque and award for outstanding service from the society at a recent meeting of the Halifax Chapter.

The group met at the home of Mr. & Mrs. John W. Hogg where Dr. Cos Leefmans, treasurer of the local group, made the presentation.

Mrs. Robert Schmitt conducted the program, a Hibiscus bloom judging class.

AMERICAN HIBISCUS SOCIETY ON T.V.

The Sunset Chapter will present a program on TV over Channel 8, Tampa the 1st or 2nd Saturday in May. Be sure to be on the lookout for the program and tell all your friends to catch the show too. It will be well worth your while.

Mrs. Wylie, president of the Sunset Chapter, tells us that the general plan thus far is to show the different forms of Hibiscus and also describe them by color as t e show is in black and white. Also there will be a short section on fragrant blooms and seedlings in all stages.
